The Police (Descriptions of Service) Order 2012

In June 2011 the Government published ‘The National Crime Agency: A Plan to Create a National Crime-Fighting Capability’. The Crime and Courts Bill makes provision for the creation of the agency, including provision in relation to its police paraunit and eligibility of members of the agency’s staff. Pending the coming into force of the Crime and Courts Bill, the Government is taking preliminary steps towards the establishment of the agency including the appointment of senior staff to oversee its development.

United Kingdom Statutory Instrument

Supply and Appropriation (Anticipation and Adjustments) Act 2007

An Act which authorises the use of resources for the year ending 31 March 2009 and 2010, for the purposes of particular grants and to enable the resources to be adjusted between different years. It also provides for the resources to be transferred to the Consolidated Fund from other funds.

United Kingdom Statutory Instrument

Supply and Appropriation (Anticipation and Adjustments) Act 2014

An Act which authorises the use of resources for the year ending 31 March 2016 and 2017, for the purposes of particular grants and to enable the resources to be transferred to the Consolidated Fund from other funds. It also provides for the resources to be transferred to the Consolidated Fund from other funds.

1. NATIONAL CYBER SECURITY AS THE CORNERSTONE OF NATIONAL SECURITY.

By KOVARCZIS, Laszló. Revista Academiei Române Teoretice 2018, Vol. 23 Issue 2, p115-120. 8p. Abstract: The more advanced an economy and society, the more exposed it is to cyber threats. Consequently, countries with advanced digital economy and digital infrastructure naturally need to pay more attention to protecting cyberspace. Today it is a national security issue and it can no longer be argued that cyber security is a non-essential part. Accordingly, a national cyber security strategy has to be built on national security strategy. That is the main reason for using the word “cornerstone” in the title of this study. The relation between national security and national cyber security means a specific context, which is one of the subjects of our examination in this study. Today, most countries have a cyber security strategy. However, these strategies are mostly static documents that do not or only partially can handle the dynamism that characterizes cyberspace. This paper focuses on the key issues that are needed for developing a usable cyber security strategy. [ABSTRACT FROM AUTHOR] (AV: 100035598)

Subjects: COMPUTER security, NATIONAL security, COMPUTER crime prevention, STRATEGIC planning, INFRASTRUCTURE (economics), National Security, SECURITY measures

2. CYBER SECURITY POLICY AND STRATEGY IN THE EUROPEAN UNION AND NATO.

By KOVARCZIS, László. Revista Academiei Române Teoretice 2018, Vol. 23 Issue 1, p16-24. 9p. Abstract: Nowadays it is clear not only for professionals but also for civilians that our advanced Western societies cannot operate without the infrastructure based on information technologies. The security of these infrastructures, which are present in public utilities, economic life, public administration, defence sector or even in the smallest detail of everyday life, have a vital importance. The reason for this is very simple: if these systems do not work, then society does not work either. The importance of cybersecurity can no longer be questioned. Accordingly, the challenges and threats to cybersecurity have to be addressed at strategic level. This paper presents the most important cyber security principles and strategies of the European Union and NATO. [ABSTRACT FROM AUTHOR] (AV: 10279384)

Transformation of Cyber security into an Effect Tool in International Politics and International Actions. By GÜNTAY, Vahit. Security Strategies Journal April 2018, Vol. 14 Issue 27, p79-111, 33p. Language: Turkish. Abstract (English): Cyber area, which becomes one of the important factors of changing world, attracts attention with its qualities. Cyber attacks that create a parameter in terms of interest struggle are included into the discussion field of International relations through affecting different actors. Cyber security, which became an effect tool in international policy, has started to transform many of its components into attacking concept. In this context, approaches and conceptual unity within international relations have also made cyber area to be researched theoretically. In this study, cyber attacks and data about cyber intelligence are evaluated in terms of international policy, and evaluations on actors are analyzed theoretically and through practical examples. [ABSTRACT FROM AUTHOR] (AV: 100037292)

1. The Case for Disappearing Cyber Security.

By: Dykstra, Josiah; Spath, Eugene H. Communications of the ACM. July 2016, Vol. 61 Issue 7, Pages 31-42. 3p. 1 Diagram. Abstract: The author argues that cyber security should be kept out of sight and out of mind for end users. Topics include the possible deployment of less-vulnerable systems by developers using tools or techniques such as code minimization and type-safe languages, the failure of end users to take actions required to improve cyber security, and end users' acceptance of automatic patch updates built into desktop software. DOI: 10.1145/3137764. (WJ: 2744720)

Subjects: Automation; Wired Telecommunications Carriers; Internet Publishing and Broadcasting and Web Search Portals; Computer systems design and related services (except video game design and development); Internet security; End users (information technology); Upgrading of computer software; Computer software installation

2. Engaging Consumers in Cyber Security.

By: Medeiros, Theresa E. Journal of Internet Law. Feb 2018, Vol. 21 Issue 8, Pages 53-56. 10p. Abstract: The article examines consumer protection in cybersecurity legislation as of February 2018. Topics include the need to change the consumer protection model used in the information and communication technology sector to prevent distributed denial of service attacks, the cyberthreat landscape, and the threat posed by botnets on interconnected systems. Also discussed are the evolution of cyber security legislation and the new trends in engaging consumers with cybersecurity. (WJ: 197811554)

Subjects: Consumer protection; Information & communication technologies; Botnets (Computer networks); Administration of General Economic Programs; Other: Justice; Public Order; and Safety Justices; Internet Publishing and Broadcasting and Web Search Portals; Wired Telecommunications Carriers; Internet security; Denial of service attacks

By: Kimer, Sean Michael. eWeek. 12/22/2017, p1-4. 4p. Abstract: The article focuses on the trending cyber security systems for organizations for the year 2018. It talks about the ransomware threat faced by AXIA. (WJ: 299502795)

Subjects: Ransomware; Data protection; Artificial intelligence; Internet Publishing and Broadcasting and Web Search Portals; Wired Telecommunications Carriers; Cyber intelligence (Computer security); Internet security
